DS4 Checkweigher

Product Features

- Compact system designed for weighing packaged products up to 3Kg
- Multiple system configurations available to suit product size and required throughput
- Open Modular frame design with minimised wiring for ease of maintenance and cleaning
- Product library with a capacity to store up to 800 products allowing fast changeover between products

- Fully compliant to supermarket specifications
- Automatic mean weight correction to help comply with average weights legislation
- Pack tracking via gating sensors and integrated encoders
- All production data archived to memory for future recall
- System error warnings and hardware systems check
- Integrated event logging for audit trail
- Data output via USB port or Ethernet cable to factory management software

15.6" Full colour, easy clean, touch-screen display with multi-level password access, presenting an array of statistical and graphic data

Airblast, Bat off, Ram and Divert Rejects available

Tool free removal of guards and conveyors

Conveyor drive via low voltage brushless DC motors with digital speed control

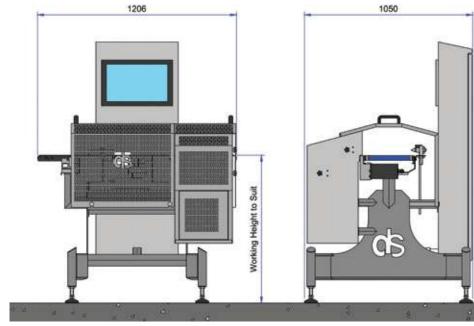

Reject bin door sensing with electronic access via HMI

Reject confirmation and bin full sensors

Fully compliant to supermarket COP's
